Spotlight Products

Spotlight Technology provides products to mid-tier companies who need an integrated solution for their data warehouse, BI, analytics, discovery, and visualization use.

Spotlight integrates best-of-breed products from various vendors into an integrated architecture stack that addresses three main market opportunities:

1. Tableau Appliance – serving the needs of business
2. General BI Appliance – serving the needs of business / IT
3. SQL Server Appliance – serving the needs of IT

The components (top to bottom) address the needs of business users in the areas of:

- Statistics
- Visualization
- BI & Reporting
- Database / Data Warehousing
- Extract, Transform, Load (ETL)
- Hardware
- Deployment
- Setup Services

Spotlight Services

Spotlight's services address four main areas:

1. SQL Server migration
2. System StartUp – ensure your initial business needs are set-up in the appropriate appliance
3. System TuneUp – ensure your ongoing business needs are evaluated on a regular basis
4. System CheckUp – monitor your ongoing business needs for usage

Spotlight Markets

Spotlight's products and services are ideal for mid-tier companies in any of the following markets:

- Retail / Consumer Goods
- Grocery / Supermarket
- Travel
- Media / Entertainment
- Financial Services
- High-Tech
- Academic Institutions
- Oil / Gas
- Hospitality / Gaming

Spotlight's products have been proven in real-world customer situations by delivering value for businesses that need:

- Integrated analytical tools for data-driven decisions
- Better performance, capacity, and scalability
- Ease of use and administration
- Cost-effective, complete appliance-based solutions
